SKILLS

Languages

Java (8-17), Kotlin, Go, TypeScript

Frameworks

Spring Boot, Spring Security, Hibernate/JPA

API & Messaging

REST, SOAP, OpenAPI/Swagger, API Gateway, RabbitMQ

Databases

PostgreSQL, Oracle, Redis, Liquibase/Flyway

DevOps & Cloud

Docker, Kubernetes, AWS, CI/CD, Jenkins, Git

Testing & Quality

JUnit, Spock, SonarQube, Maven/Gradle

AI & Tooling

OpenAI / Anthropic API, prompt engineering, GitHub Copilot, Cursor

Languages

Polish — native · English — C1

EDUCATION

WSB Merito University, Bydgoszcz

Informatics in Business, M.Sc. | 2024 - present

Nicolaus Copernicus University, Toruń

Informatics, B.Eng. | 2020 - 2024

PROFESSIONAL EXPERIENCE

Agro Aplikacje Java Developer

Department of Development | 10.2025 - present

- Designed and shipped backend services for a nationwide benefits platform serving the Ministry of Agriculture — service layers, repositories, and request handlers. — *Java, Spring Boot, Hibernate*
- Built event-driven integrations that drive dynamic form behaviour from real-time external-service statuses. — *RabbitMQ, REST, Swagger*
- Cut critical-query execution time ~30% by removing redundant nested SELECT/JOINS and duplicate columns, lowering DB load. — *PostgreSQL, Oracle*
- Owned ~30 production incidents/week, including a critical transaction failure (faulty ResultSet) and a third-party schema bug resolved end-to-end via log analysis and vendor coordination.
- Killed a recurring frontend navigation bug by introducing automatic ID generation for list objects.
- Authored the team's living architecture compendium — adopted as the onboarding and reference standard for a 15-person cross-functional crew.
- Sustained delivery quality across ~20 PR reviews/week and sprint estimations; contributed to a monolith-to-microservices migration (~4 services extracted). — *Asseco collaboration*

Savangard Junior Java Integration Developer

Integration Team | 07.2023 - 10.2025

- Integrated core banking APIs and built Open Banking modules in the financial sector. — *Java, Spring, Go, REST/SOAP, PolishAPI*
- Routed and secured API traffic through an API Gateway with PostgreSQL-backed persistence. — *API Gateway, PostgreSQL*
- Delivered and enhanced order-processing solutions for Credit Agricole — business-requirement analysis and external-system integration.
- Modelled systems and prepared cost estimations and technical specifications in Enterprise Architect under senior-architect supervision.

AWARDS & RECOGNITIONS

UGoIt Hackathon — 2nd Place

Built and presented a working POC of a price-comparison app for major discount retailers — aggregating product pricing, tracking promotional cycles, and alerting users to regionally lowest prices. Delivered as a full demo under hackathon time pressure.
